

Storage reliability analysis summary report

■

Alternate Flows

Describe the different ways the interaction described in the Main Flow above can be carried out. Relate back to specific points in the Main Flow. As well, the Main Flow should contain a reference forward to the Alternate Flow List each variation on the use case as a separate sub section of the Alternate Flows as A1, A2. Don't be too concerned if you can't decide if something is an Alternate or Exception Flow (below), just use your own discretion.

Exception Flows

List each error condition as a subsection of the Exceptional Flow. As with the Alternate Flows, exceptions may refer back to steps within the Main Flow or they may refer to events that aren't specific to a single step.

Common Way to Use		Type of Service	Public Services
PC (Windows, Mac)	Smartphone (iOS, Android)	Data storage	Amazon S3, Dropbox, Sugarsync, and so on
Web browser or Client program	Application	Office suite + data storage	Google Docs, SkyDrive
		Note storage + data storage	Evernote, Awesome Note

NASA/ADS This document summarizes storage reliability data collected by the US Army Missile Command on electro-mechanical devices over a period of several years. Sources of data are detailed, major failure modes and mechanisms are listed and discussed. Non-operational failure rate prediction methodology is given, and conclusions and recommendations for enhancing the storage reliability of devices are drawn from the analysis of collected data. Publication: Pub Date: September 1982 Bibcode: 1982rayc.reptf...S Keywords: Electromechanical Devices; Failure Modes; Reliability; Storage Stability; Accelerometers; Data Bases; Data Reduction; Electric Motors; Failure; Gyroscopes; Mathematical Models; Predictions; Pressure Switches; Rates (Per Time); Launch Vehicles and Space Vehicles @inproceedings{Malik1978StorageRO, title={Storage Reliability of Missile Materiel Program. Storage Reliability Analysis Summary Report, Volume 1. Electrical and Electronic Devices}, author={Dennis F Malik}, year={1978} }Abstract : This report summarizes analyses on the non-operating reliability of missile electrical and electronic devices. The analyses are part of a research program being conducted by the U. S. Army Missile R and D Command, Redstone Arsenal, Alabama. The objective of the program is the development of non-operating (storage) reliability prediction and assurance techniques for missile materiel. Included are analyses of integrated circuits, semiconductors, vacuum tubes, resistors, capacitors...
